Dear Sir:

Pursuant to 37 C.F.R. § 1.97 and § 1.98, Applicants submit for consideration in the above-identified application the documents listed on the attached Form PTO/SB/08a/b. Copies of the documents are also submitted herewith. The Examiner is requested to consider and make these documents of record.

Document numbers 1 and 2 are recently granted patents that were also filed by the Applicants. They are not in the same patent family as the present application, but are related to PTH. Document number 9 is the notice of Allowance for document number 1. Document number 20 is the notice of Allowance for document number 2.

Document numbers 3 and 17 are from related application number 10/945,608.  
Document number 4 is from related application number 11/799,726. Document number 5 is from

Patent Interference 105,575 (MPT), which involves related application number 10/641,780. Document number 6 is from application number 11/437,428. Applicants filed related application number 10/760,091 to provoke interference with application number 09/898,398. Application number 11/437,728 claims the benefit of application number 09/898,398.

Document numbers 7 and 8 are from application number 10/168,185. Applicants filed related application number 10/945,608 to provoke interference with application number 10/168,185. Document numbers 10-12 are from application number 11/516,912, which is also filed by the Applicants and related to PTH, but not in the same patent family as the present application.

Document numbers 13-16 are from *Scantibodies Laboratory, Inc. v. Immutopics, Inc.*, at the United States District Court for the Central District of California, Case No. CV 04-08871 MRP (MANx), now appealed at the United States Court of Appeals for the Federal Circuit, Case No. 2008-1522. This litigation involves U.S. Patent No. 6,689,566. The present application is a Continuation-in-Part of U.S. Patent No. 6,743,590, which is a Continuation-in-Part of U.S. Patent No. 6,689,566. Scantibodies Laboratory, Inc. is assignee of the present application. Document number 14 is an Amended Claim Construction Order.

The Court vacated the previous claim construction order and reached the following construction of terms:

1. “Specific for” is defined as having a measurable affinity for and detectable binding to an epitope having at least four amino acids of the seven in SEQ ID NO: 3. In addition, the affinity is higher than the affinity for any other epitope of the whole PTH sequence.

2. “Specifically binds to whole parathyroid hormone” means having a measurable affinity for and detectable binding to whole parathyroid hormone.

3. “Does not specifically bind to an interfering non-(1-84) parathyroid hormone fragment” means having no measurable affinity for and no detectable binding to an interfering non-(1-84) parathyroid hormone fragment, the fragment as defined below. No measurable affinity means an association constant of less than 105 liter/mole.

4. "Not detecting an interfering non-(1-84) parathyroid hormone fragment" is construed to mean having no detectable binding to an interfering non-(1-84) parathyroid hormone fragment.

Document number 18 is from reexamination Control No. 90/007,412. Applicants are the Third Party Requester in that matter. Document number 19 is from related application number 10/641,780. Document numbers 21-24 are from related Japanese Patent Application No. 2000-593958. Document numbers 25 and 26 are from related Canadian Patent Application No. 2,360,020.
